I was running several chowpy-chowpers. First was the BC-375
'Unstable Mable', second was Big Bertha Radiomarine on a special
doubling mode that gives here a touch o' class/chowpy-chowpy,
and then I had on the tv rocko in the HW-16 (actually it is pretty
close to perfect in its keying). If it was a 599 signal, it was
Big Bertha Radiomarine, because when I load her up to the gills
(half kw) she chowpy-chowps nicely when doubling out of the oscillator.
(Makes for a nice period signal.....(:+||.....)

For the fun of it I may have to stoke up Grandma Hartley (Henrietta's ol' lady), on the 3579.545 QRG.

Anyone know what the SSB stuff is that I keep hearing on 3580USB?
Dog Charlie and Golf Zulu and such.....?

This sounds quite interesting! Do get us some info. I am not an AMmer, but might listen in a bit.

We had a number of fellers aboard last night with duelling B-17 Bomber Radio's.... A first for me! Had everyone from east o' that little cow town o' Dallas checking in.....

So, Fellers, grapples ye up yer tin cans, an' keeps yer keys a'ready at the fore, so's we cans plies the ol' ether waves again tonite!

73/ZUT DE NA4G/Bob

p.s. I sense, deep down, that the fond glow of a 6F6 with the TV rock, drivin' an 807, drivin' an 833 might make for some interesting holes in the ether.....hmmmm, ther's a hamfest a'coming up in a week or so.... may haves to snoop around an' sees wat we can sees.....
